KPMG and H2 Ventures are excited to present the fourth annual ‘Fintech100’ report which compiles a list of the year’s best fintech innovators from around the world.

The Fintech100 represents the most innovative companies, creating products and services at the juncture of technology and financial services who are seeking to disrupt the existing processes and products that dominate the marketplace, with fintech companies from 29 countries featuring in this year’s 100.

The Fintech100 is divided into two sub-lists: (1) the ‘Top 50’ established fintech firms around the globe, which are ranked based on innovation, capital raising activity, size and country; and (2) the ‘Emerging 50’ firms, which are newer companies that are at the forefront of innovative technologies and practices and often pursuing new business models.

We’ve selected the companies in the Fintech100 following extensive global research and analysis based on data relating to ten dimensions, including the core five factors noted below:

1. Total capital raised
2. Rate of capital raising
3. Geographic diversity
4. Sectorial diversity
5. X-factor: degree of product, service and business model innovation (a subjective measure that is applied only with respect to companies appearing on the Emerging list)

These selection criteria are the key metrics used to calculate the rankings of companies in the Fintech100 list because of the emphasis that venture capitalists place on the ability of firms to generate scale and a long term sustainable competitive advantage.

The Fintech100 in 2017 includes:

- 41 companies from the UK and EMEA (Europe, the Middle East and Africa),
- 29 companies from the Americas (North and South America), and
- 30 companies from Asia (including Australia and New Zealand).

China continues to dominate the fintech landscape, representing 5 of the Top 10 fintech companies in 2017. This follows the trend from previous years, as Chinese incumbents continue to scale with a heavy emphasis on payments and insurance. EMEA dominates the Emerging 50, with 29 companies on that list. From an APAC perspective, Australia’s place in the global fintech landscape is also on the rise, with 10 companies in the List.

The sectorial breakup of the Fintech100 is as follows:

- 32 lending companies,
- 21 payments companies,
- 15 transaction and capital markets
- 12 insurance companies,
- 7 wealth companies,
- 6 regtech & cyber security companies,
- 4 blockchain and digital currencies companies, and
- 3 data and analytics companies.
Whilst lending and payments companies dominate the 2017 List, we also note the rise of data and analytics companies. Data and analytics is an important enabler of the financial services industry and innovation in this area is crucial for the industry to continue to serve the needs of customers and maintain relevance, in the face of growing competition from outside of the traditional industry boundaries. To this end, banks and other financial institutions must optimise their ‘data assets’ and enhance their capabilities (both internally and through working with fintech companies) in order to defend their existing profit pools and position themselves to explore new market opportunities.

A new theme which emerged from analysis of the companies in the Fintech100 is open banking – designed to foster greater empowerment of customers (consumer and small business), transparency and levels of competition. Open banking is not just the future of financial services; it is the future of commerce itself as open ‘banking’ is just the start – as it progressively extends to other segments of the financial services industry and then beyond, including energy, telecommunications, etc. Open data will be the catalyst for a new phase of enablement and disruption, leveraging technology and data to create new and improved products and services for customers. Open banking regulation in the UK, Europe, the United States and Australia is the start of this change. This year’s Fintech100 includes 15 companies that are seeking to be a part of this solution. Founders and CEOs must have the agility and flexibility to adopt a ‘plug and play’ structure in a race against time and competitors.

The companies on the 2017 List have raised over US$28 billion in venture capital (including from strategic investors) and more than US$5.5 billion of capital in the last 12 months.

We congratulate the Top 10 companies in the Fintech100 for 2017:

1. Ant Financial is the world’s largest third-party payments platform
2. ZhongAn uses big data to automate online property insurance
3. Qudian is an online electronics retailer offering monthly instalment re-payments
4. Oscar seeks to radically transform health insurance through technology
5. Avant is the fastest-growing marketplace lending platform for short-term consumer credit
6. Lufax online financial asset trading company and uses big data to analyse risk
7. Kreditech underwrite under-banked customers within seconds
8. Atom Bank is the UK’s first purely digital retail bank
9. JD Finance uses its e-commerce expertise to provide finance across seven verticals including consumer finance, crowd-funding and payment services
10. Kabbage funds small businesses through its automated lending platform

You can read all about these companies, and many others, in the following pages.

China, China, China
First, second and third place, on this year’s Fintech100, are occupied by Chinese fintech firms. These firms are continuing a trend that is several years in the making and highlights the extraordinary rise of the fintech industry in China.

Aggregate capital raisings
The ‘Top 50’ companies have raised US$4.8B in the last year alone and over US$27B in aggregate capital over their lifetimes. Within the ‘Emerging 50’, over US$600M has being raised in the last year and just over US$1B has been raised in total (since founding).

Major funding rounds and increasing interest from notable investors
Twelve companies on the Fintech100 have raised over US$100M, notably ZhongAn’s USD1.5B raise in conjunction with its recent IPO on the Hong Kong Stock Exchange. Venture investors in Fintech companies include: Sequoia Capital, Index Ventures, Founders Fund and Y Combinator, together with strategic investors such as Goldman Sachs, Morgan Stanley, MasterCard and American Express.

Geographic diversification as an ongoing theme
The Fintech100 includes a broad range of fintech companies from 29 different countries, with companies from Korea, Mexico and Poland included for the first time. It is noteworthy that 19 countries are represented in the Top 50. It is clear that no one nation or region ‘owns’ fintech innovation – fintech is a global phenomenon.

The UK & EMEA dominate the Emerging 50
26 companies from the UK & EMEA are listed in the ‘Emerging 50’, compared to 10 in the Americas, and 14 in Asia (including Australia and New Zealand).

Asia Pacific on the rise
30 companies from the region feature on the list, many of these in the ‘Emerging 50’, including 10 companies from Australia. This evidences a regional focus on the fintech sector and it reflects the explosion of fintech startups across the region.

Lending and payments hold the fort
The number of lending and payments related businesses continues to stand out in this year’s Fintech100, with 32 and 21 companies respectively. Disruption in the lending space continues to be a focus given the size and profitability of the segment and is expected to drive further innovation.

Data is the core of fintech business models
Data is the lifeblood of any financial institution; and will be a critical foundation for the successful adoption of any advanced analytics and artificial intelligence. The vast majority of companies in the Fintech100 are using data, analytics and artificial intelligence to fuel their business models.

Disruptors continue to stand out in the market
Disruptive fintech continue to dominate the Top 50, which are those companies that are radically changing their industry paradigm for all players and competing directly with financial institutions. However, the importance of ‘enablers’ (companies developing B2B solutions and working with financial institutions) has remained steady. This year’s Fintech100 features 27 that are ‘enablers’ – working across banking, insurance and wealth management.

Open banking around the world
Some of the most exciting enablers are working with the largest banks and financial services firms in the world. Increasingly, these companies are adopting ‘plug-and-play’ models. Open banking regulation in the UK, Europe, the United States and Australia has been a major catalyst for this change. This year’s Fintech100 includes 15 companies seeking to be a part of this solution.

“Since we began providing funding in 2011, we’ve extended nearly $3 billion to 100,000 small businesses across the U.S. To date, our customers have connected more than 1.4 million data sources to the Kabbage Platform to receive an automated decision and rapid access to capital.” - Kathryn Petralia
SoFi assists consumers, such as early stage professionals, with their financing options across a range of lending options and structures: student loan refinancing, mortgages, and personal loans. SoFi’s unconventional approach with underwriting considers account merit, employment records and a series of other key factors, creating a more holistic way of serving their customers. Individual and institutional investors are also able to positively impact social groups and the broader community while also gaining attractive rates of return.

Square

“<It’s (profitability) always something we are driving towards but we want to make sure that we have a good balance between driving profit and investing in the company.” - Jack Dorsey

Company Description

Square supports businesses from a register in one’s pocket to reports on their laptop. The technology integrates a full point of sale alongside tools for every component of operating a business such as inventory management and financing options. Two products include Square Cash, which enables easy money transactions, and Square Order, a means of pre-ordering and picking up food and drinks.

Xero

“We are going to do everything we can to reduce low value accounting work to free up time for people to drive growth strategies for their business customers. And we are unapologetic about that.” - Rod Drury

Company Description

Xero is a cloud-based accounting software business that enables small businesses to adopt an easy-to-use platform. The software enables people to connect with each other on any device, at any location, at any time, with any numbers and figures. Xero builds a trusted network of accountants and bookkeepers and strengthens their relationships through online collaboration. Small businesses can access a full accrual accounting system with a cashbook, automated daily bank feeds, invoicing, debtors, creditors, sales tax and reporting.

### Stripe

**Company Description**

Stripe offers a means of accepting payments online and in mobile apps, utilizing bank accounts from local and international cards. It adopts a friendly approach and processes billions of dollars per annum, serving thousands of companies across a broad range of sizes. Stripe focuses on assisting developers, makers and creators. By facilitating frictionless transactions, Stripe addresses a problem rooted in code and design, not finance. The Application Programming Interface is solid, clean and enables users to focus on building great products.

“It’s really easy for technology companies once they’ve reached a modicum of success to feel very satisfied and rest on their laurels. You have to continue to earn that success year after year after year.” - John Collison

“We know in identity and attribute sharing it has to be that simple to use, but if we can make it that simple and new to privacy ... and higher in security, then it’s going to be the envy of the world.” - Greg Wolfond
solarisBank operates as an API-accessible banking business, under a German banking license to address the needs of the digital economy. The Platform creates customised solutions to assist and empower startups, fintechs and established digital companies to solve their financial needs. Supporting the growth of the digital economy is a key component of solarisBank’s vision.

Notable Investors
Anato Financial Solutions, SBI Holdings, UniCredit Group, yabeo capital, FinLeap

"Only if you grow quickly and across borders will you be able to make it in this business. As a first mover, we have an advantage." - Dr. Roland Folz

Adyen is an innovative player in the payments industry which provides advanced solutions to over 3,500 customers. The platform enables streamlined global payment transactions, improves customer experience, improves processes and ultimately enhances business performance. Mobile and Point-of-Sale avenues are available with over 187 transaction currencies and 250 payment methods.

Notable Investors
ICONIQ Capital, Index Ventures, Felicis Ventures, Temasek Holdings, General Atlantic

"Adyen is a single solution – and we build everything in-house, with one platform that works end-to-end, so that no transactional data is lost." - Pieter van der Does
**Affirm**

**Company Description**

Affirm is recreating core components of financial infrastructure in a creative and bottom-up way. The aim is to improve the lives of everyday consumers with a more affordable and transparent means of accessing financial products. Installment loans are available to consumers at the point of sale, creating greater flexibility around payments and timings. Pricing is also dynamic and adaptable based on risks in real life.

Company Description
Lendingkart Group serves entrepreneurs by allowing them to easily access working capital finance options, eliminating or reducing their concerns or worries about cash flow gaps. Big data analysis and technology tools create a more efficient and effective way of evaluating one's credit worthiness, subsequently offering other related services. A potential client can have their credit risk profile evaluated and assessed, from their existing cash flows and business growth. Thereafter, a short term revolving credit line can be arranged as working capital.

Lendix

LendingClub is an online marketplace connecting borrowers and investors, facilitating personal loans, business loans, and financing for elective medical procedures and K-12 education and tutoring. They use technology to operate a credit marketplace at a lower cost than traditional bank loan programs, passing the savings on to borrowers in the form of lower rates and to investors in the form of solid returns.

“We have demonstrated the power of the LendingClub marketplace model to generate attractive, risk adjusted returns to investors.” - Scott Sanborn

Kueski

Company Description

Kueski is a Latin American micro-lending service, driven by a team with big data and analytics backgrounds. Users can request for small loans via online applications, outlining the quantum of money required and the time required for repayments. Kueski utilises information around a user’s credit history, their social assessment and other online data to develop a more holistic credit risk model that can decide within a short period of time whether the loan application should be accepted or rejected. Once loan approvals are granted, wire transfers will immediately take place.

Borrowell

Company Description

Borrowell is tackling Canada’s $1.5 trillion consumer lending market by automating the traditional loan application process. Its platform generates a personalised loan quote based on a 60-second application form. In partnership with Equifax Canada, Borrowell launched a free credit score service in June 2016 and saw requests from 100,000 Canadians in the following three months. They are currently expanding beyond their core loan business into a consumer finance hub and ventures through strategic financial institution partnerships.

"At the moment we want to focus on Australia and getting it out as much as we can over here. Next year we will look at opportunities overseas... The markets in America are quite saturated, whilst with Asia there are not that many options for consumers so there’s more opportunities for startups like us." - Sid Sahgal
MoneyMe targets millennial Australians by seeking to provide access to short term cash loans of up to $10,000 ‘whenever and wherever’ they are needed. The core product offering is based on a customer-centric value-add which prioritises innovation and financial responsibility, balancing the speed of rapid online approval and competitive fixed interest rates.

Pockit targets customers who have been excluded by incumbent financial institutions following changes in personal or financial circumstances. An account can be opened within minutes, and customers are provided with an online account, contactless MasterCard and money-management app. The company currently serves 200,000 customers and is seeking to expand its core business offering to direct debits and micro-loans by the end of 2017.

Notable Investors
Concentric, Belcube, Jon Moulton, Mark Newton-Jones, Sir Alex Ferguson, Danny Jatania, Kevin Reynolds, Colin Harris, and Stuart Middleton.

Qonto targets SMEs by combining a range of financial support services with a simple bank account. The service allows integration with SaaS providers such as Stripe, Slack, Sage and Cegid, and enables teams to manage transactions via their own user account. The neobank operates fully online and both accounts and access cards can be managed directly from the platform.

Notable Investors
Alven Capital, Valar Ventures

“By launching a low-cost remittance service Pockit is saving our customers money and providing a service that suits their lives. We expect it to be very attractive to our core customers who find it difficult to access conventional financial services for many reasons.” - Virraj Jatania

“Qonto, smart banking for small businesses, is the service that allows you to open a 100% online account, have your bank account in 5 minutes and order physical or virtual cards to intelligently track all the expenses of the company.” - Alexandre Prot
